

“AI Integrated Monitoring System”

An Evolved Smart Senior Care Solution

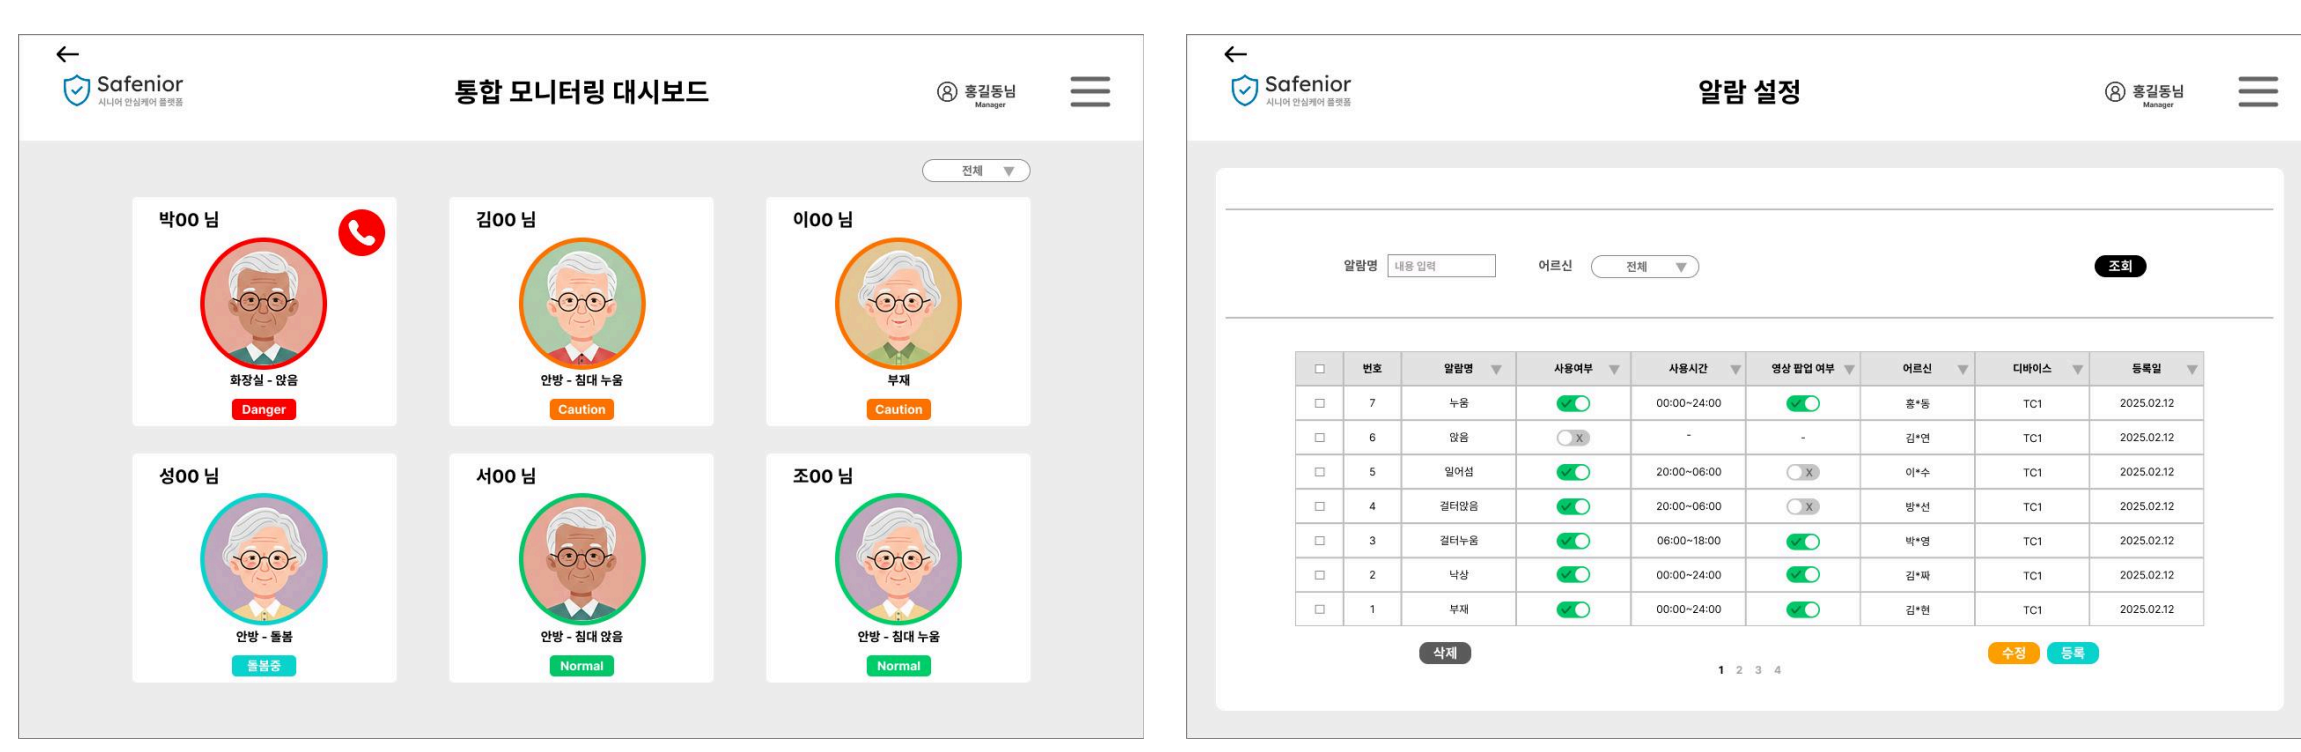

Data-driven verification. Customized care management

True-Detection Care

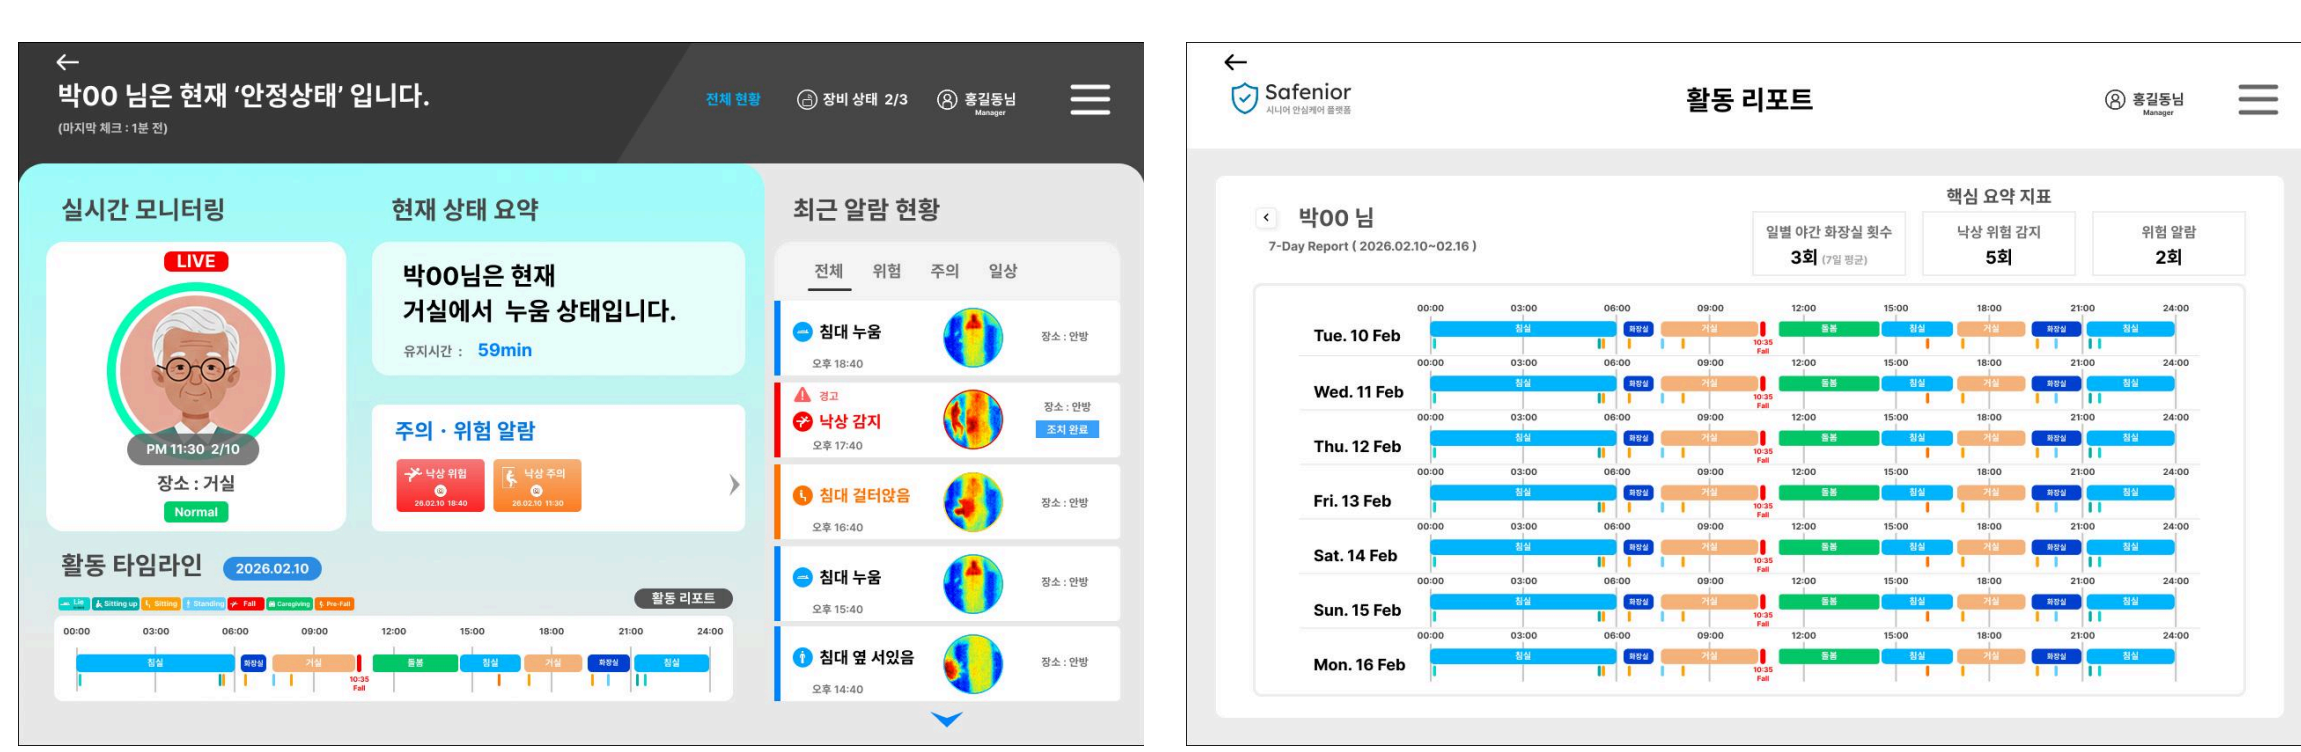

Verify on-site status instantly with **real-time non-identifiable video** and **event clips** to prevent unnecessary intervention and provide precision care.

Smart Response AI

Maximize operational efficiency with **personalized AI monitoring**. Rapid notification systems ensure **the fastest response times during emergencies**.

Evidence-based Management

Support **transparent operation** with real-time presence tracking and **weekly/monthly activity reports**, ensuring no blind spots in care.
